

Sensual luxury with clinically proven efficacy
– the frei öl® Ultra Glow Oils for face, body and hair

Sensual luxury for 52% more glow and 18% smoother skin. With the new Ultra Glow oils from frei öl®, the company is developing a new premium line that is not only a great eye-catcher in the bathroom, but also smells wonderfully seductive and is bursting with anti-aging active ingredient power.

Since October 2024, the frei öl® Ultra Glow Oil is available in **three seductive, sensual fragrance variants** and with proven anti-aging effects. The luxurious Ultra Glow Oil nourishes the face, body, even hair to the tips and gives a wonderful glow!

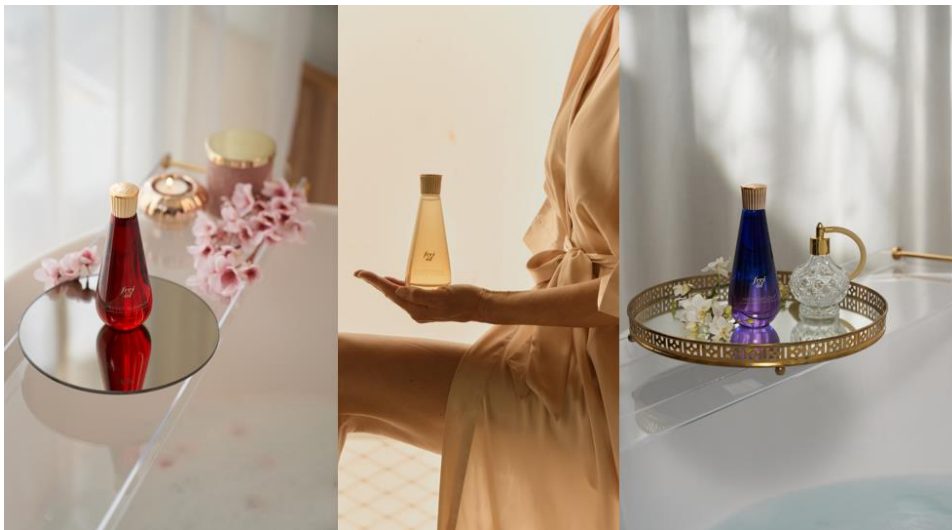

NEW: Anti-aging effect

An oil that also prevents skin aging? This is possible with Ultra Glow Oil.

Trend anti-aging active ingredients ensure that

- the skin barrier is regenerated and protected
- the cells are ultimately protected
- Collagen is boosted

What works is made visible: excellence in the composition of active ingredients. The Ultra Glow oil is composed of four natural oils as well as extracts and vitamins.

Ultra Glow Oil – the oils

Sunflower, wheat germ, jojoba and **camellia oils** form the basis of Ultra Glow oil.

A **special feature** is **camellia oil**. It is extracted from the camellia (Camelia Japonica) and is also known as the "Rose of Winter". The seeds of the plant come from one of the purest places in the world: the Korean island of Jeju.

- Camellia oil is a 2x more powerful antioxidant than, for example, vitamin E
- It boosts collagen synthesis by 119%
- Collagen breakdown is reduced by 53%
- It has a balancing effect on the complexion and inhibits hyperpigmentation
- Transepidermal water loss is reduced by up to 144%

Jojoba oil is one of the body oils that pamper the skin the most:

- It intensely moisturizes the skin
- Free radicals are fought and cell regeneration is promoted
- Fine lines and wrinkles are reduced
- At the same time, it has an anti-inflammatory and skin-balancing effect, so dry or itchy skin is a thing of the past

Ultra Glow Öl - Vitamine & Extrakte

In addition to the four oils, there is also valuable aloe vera, bisabolol and vitamins in the Ultra Glow oil. Vitamin E protects and promotes regeneration, while vitamin F nourishes the hair right down to the tips in addition to its skin-flattering effect.

Vitamin F contains polyunsaturated free essential fatty acids with a particularly high proportion of linoleic acid

- It is therefore effective against dry, cracked and flaky skin
- The lipid barrier is restored
- At the same time, it protects against hair breakage
- And improves the condition of the hair
- Vitamin F is particularly suitable for dry skin with a damaged lipid barrier and for dry scalps with brittle, dull hair

Bakuchiol – the "anti-aging miracle" for skin with a special glow effect!

Known as a gentle retinol alternative, plant-based bakuchiol works on several levels:

- It protects the cell structure
- Stimulates collagen synthesis and thus provides more elasticity and moisture in the skin
- Bakuchiol reduces wrinkles and lines
- Counteracts hyperpigmentation
- At the same time, it provides more radiance

What do we mean by GLOW? And how do you achieve this for skin and hair?

The key to more charisma

Well-hydrated skin is key to a naturally glowing appearance. When the skin is **optimally moisturized**, it reflects light better. An even skin color also plays a decisive role. Without dark spots, hyperpigmentation or persistent redness, the complexion looks harmonious and contributes to the overall impression of healthy and vital skin.

Equally important is a **plumper skin texture** that reduces fine lines and wrinkles. A smooth skin surface with fine pores can reflect light more evenly, giving the face a youthful and fresh look. This effect is supported by **improved elasticity** of the skin.

A **healthy skin barrier** is also essential to effectively store moisture in the skin. It ensures a smooth skin texture and supports a healthy, glowing appearance.

Tangible effects

The use of oil in skin care always has something sensual, because oil flatters the skin. Applied to the still slightly damp facial or body skin, the moisturizing oil can be easily distributed. Worked into damp skin with gentle pressure, it is quickly absorbed and leaves visibly and noticeably nourished skin and hair - with that special glow!

- The skin is immediately noticeably smoothed
- The tone and elasticity increase, because the oil has a firming effect
- At the same time, the skin is soothed by selected active ingredients, the skin can recover and comes into balance

Visible beauty effects

Supporting women to feel comfortable in their skin and to keep it healthy is probably our most important task. In addition to the luxury of tactile effects, the Ultra Glow oil also provides visible beauty effects.

- The skin receives a healthy glow and a natural glow
- Hyperpigmentation can be reduced and
- Irritated skin can be soothed again

The Ultra Glow oil from frei öl® offers three sensual fragrances at once, which make care with the oil a new, even more sensual experience.

Ultra Glow Oil - The Golden Hour

Golden Hour describes a fragrance that resembles a walk in the evening sun. Notes of ambergris, musk, amberwood and vanilla form the base, while spicy cinnamon and cardamom support it. Heart notes are saffron, elegant neroli and beguiling magnolia. The Golden Hour is rounded off by orange, black pepper and lemon, which gives it a citrusy note that merges from bergamot to an explosion of freshness.

Ultra Glow Oil – Velvet Blossom

Velvet Blossom is a fragrance symphony that exudes an irresistible appeal. Gently, but not without a certain sophistication, blackcurrant merges with sweet pear and forms a fruity prelude that promises pure joy. Iris, jasmine and orange notes dominate the fragrance and give it a touch of elegance. Sweet tonka beans, delicate praline, soft vanilla and exotic patchouli form the sweet conclusion.

Ultra Glow Oil – Midnight Sky

The night sky – timeless beauty, all-encompassing, astral, like the fragrance of Midnight Sky, which exudes an aura of elegance and timelessness. Delicate orange blossom and sweet vanilla combine to create a gentle start, then intensified by stronger notes of amber. A woody, earthy depth provides a sensuality that only night can produce. A gentle musky scent acts like a night breeze and gently whispers secrets of the night sky into our ears.

The three luxurious Ultra Glow oils from frei öl® are available since October 2024 in the frei öl (www.freioel.de) online shop, selected pharmacies and QVC for €34.95 (100 ml) in an aesthetic glass bottle.
