

Coolifting Showcases Its Cutting-Edge Anti-Aging Technology at Beautyworld Middle East 2025

Dubai, UAE – 27/10/2025 – **Coolifting**, the globally acclaimed non-invasive facial rejuvenation treatment, will be showcased at **Beautyworld Middle East 2025** in Dubai, offering visitors the opportunity to discover the future of aesthetic innovation live.

Developed by **BeautyGun S.L.** (Spain), Coolifting is a breakthrough technology that delivers a powerful CO₂ flow combined with high concentrations of active ingredients to hydrate, lift, and rejuvenate the skin—in just five minutes and without downtime.

Already present in over 40 countries, **Coolifting is revolutionizing the beauty and aesthetics industry** by offering an effective, needle-free alternative for skin revitalization. The treatment stimulates collagen production, improves elasticity, and visibly reduces fine lines, making it a preferred choice for aesthetic clinics, medical spas, and beauty professionals worldwide.

“We are thrilled to present Coolifting at Beautyworld Middle East,” says Fermín San Martín, Head of Business Development at BeautyGun S.L. “This region is key to our global strategy, and we are actively seeking partners and distributors across the GCC and Asia in general.”

Live Demonstrations & Exclusive Partner Opportunities

Attendees can experience Coolifting first-hand with **live demonstrations** at **Hall 4, Stand F26**, and speak directly with the brand’s experts about how to integrate this technology into their business.

Why Coolifting?

- Immediate lifting and firming effect
- Non-invasive and painless
- No recovery time
- Suitable for all skin types
- Clinically tested and CE-certified
