

Revolutionary Anti-Aging Technology “Coolifting” Expands Global Reach with Impressive Results and Growing Demand

Barcelona, Spain – 01/07/2025 – The beauty and aesthetics industry welcomes a breakthrough in non-invasive rejuvenation: **Coolifting**, a patented technology that delivers instant lifting and anti-aging effects in just minutes, without needles, downtime, or discomfort.

Developed by **Beautygun SL**, Coolifting uses a powerful CO₂ flow at low temperature and high pressure combined with a high concentration of active ingredients to hydrate, firm, and revitalize the skin. This synergistic effect stimulates microcirculation and promotes collagen and elastin production, resulting in visibly smoother, plumper, and more radiant skin—after only one session.

"Coolifting is a game-changer for both clients and professionals," says Mr. Philippe Plan, CEO of BeautyGun S.L. "It offers immediate results, is safe, fast, and enhances any aesthetic routine or skincare protocol."

Coolifting is ideal for the face, but can be used in neck, décolleté or hands. With no side effects or recovery time, the treatment can be performed during a lunch break and is suitable for all skin types and ages.

The device is now available in over 40 countries, with growing popularity among top aesthetic clinics, medical spas, and beauty professionals. In response to increasing demand, BeautyGun is expanding its distribution network across North America, Europe, Asia, and the Middle East.
